About Us

FOCUS GROUP is a diversified, intelligence-led risk management company. We advise on, execute and deliver risk management solutions using a holistic and pro-active approach with the objective of helping our clients become more resilient in an increasingly complex, global and digitalised risk environment.

 **Rhula Intelligent Solutions** is a fully licenced Mozambican company founded almost a decade ago. Rhula Intelligent Solutions is the operating entity of Focus Group in Mozambique. 51% of the company is owned by our local Mozambican partners and 49% by Focus Group.

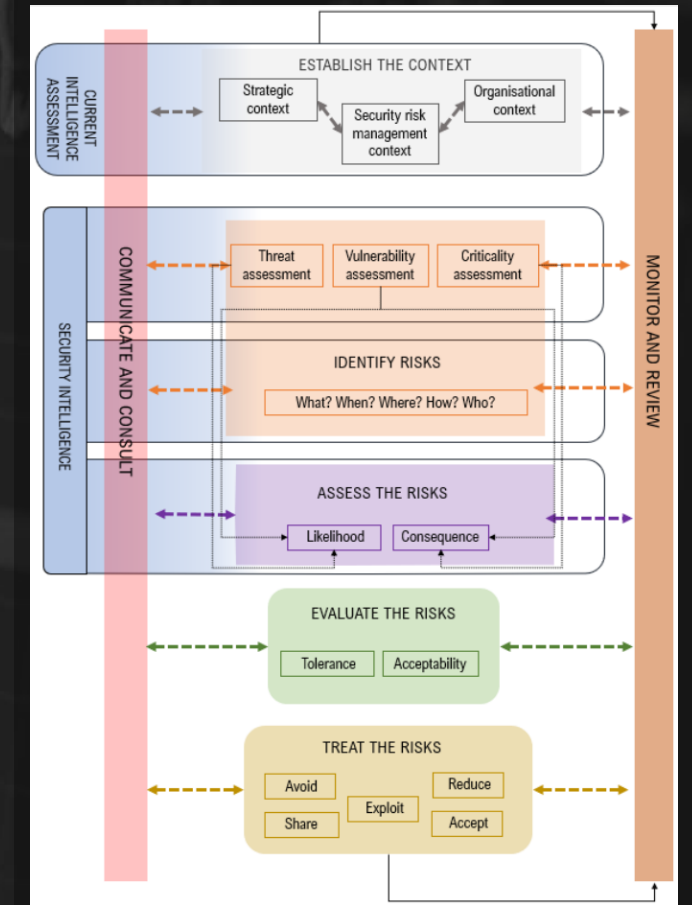

Travel Solution Overview

Focus Group provides a comprehensive and all-inclusive turnkey travel management solution:

- **Threat and Risk Assessment:** Determine threats by conducting a comprehensive risk assessment
- **Armoured Vehicles:** Various levels of protection available
- **Driver and Armed Personnel:** Professionally trained (local nationals and expats)
- **Surveillance Equipment:** Wide variety of basic and advanced options
- **Mapping and 3D Flythrough Software (TACIS):** For detailed route planning and modelling
- **Backoffice Analyst Support:** Consolidation and analysis of open and closed source information as well as surveillance data to provide incident analysis and mapping, alerts, route assessments as well as terrain mapping

Threat and Risk Assessment

1) Initial Assessment	Establish the strategic, operational and risk context
2) Asset Characterisation	Asset ranking and critical point identification
3) Threat Characterisation	Threat source identification and ranking, threat source characteristics and threat source scenario selection
4) Consequences Assessment	Scenario critical point, risk scenario consequence and consequence-based prioritisation
5) Vulnerability Assessment	Key aspect and performance vulnerability, performance-based vulnerability assessment, vulnerability to risk scenarios
6) Threat Assessment Likelihood	Specific threat capability, target attractiveness as well as threat likelihood and prioritisation
7) Risk Assessment	Risk register

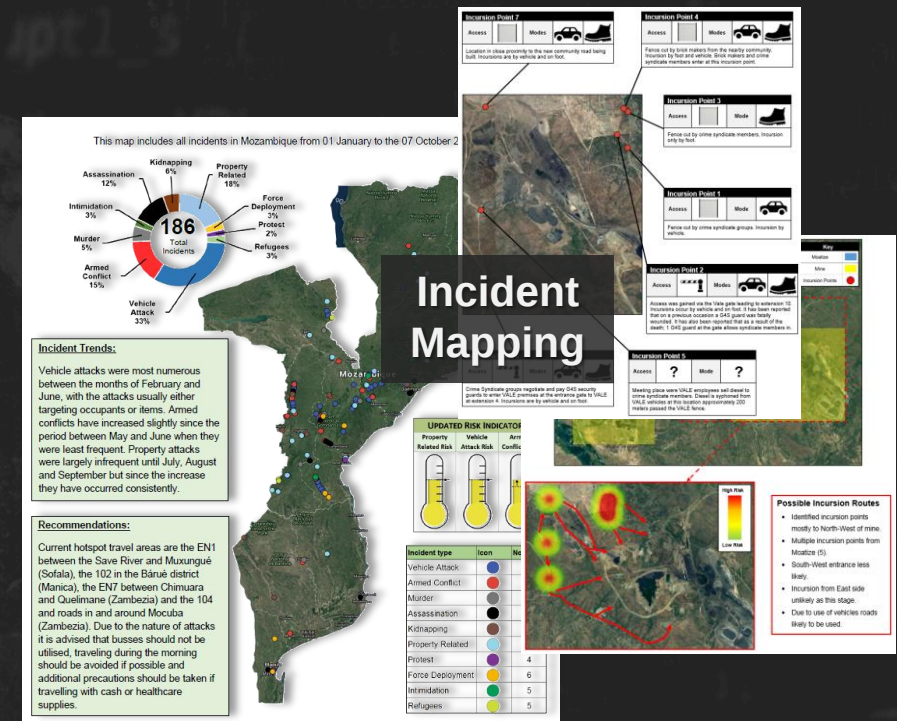

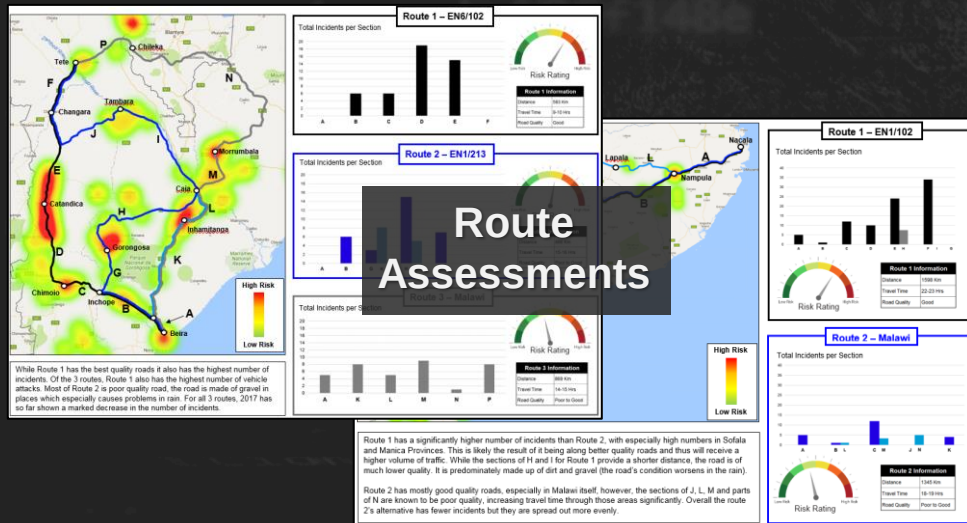

Information Services

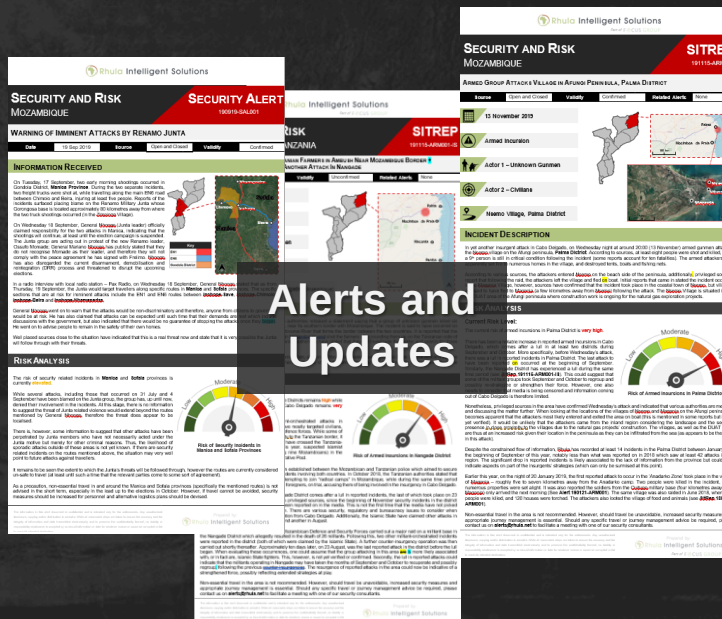

Analyst Backoffice Support

- Incident Mapping
- Data Collection and Analysis
- Alerts, Situation Reports and Information Notes
- Regional Route Assessments
- Travel Advisories

- Incident Mapping

Alerts and Updates

Armoured Vehicles

- Professionally engineered discreet ballistic protection solution
- Protection level: handguns to assault rifles
- Private and commercial sector applications
- Armoured vehicles available to rent or to purchase
- Vehicles provided with a trained driver
- Optional: trained armed security personnel (local nationals and expats)

Standard kits are manufactured to:

Level EN 1063 BR 2

- Handgun protection up to 9x19mm Parabellum
- Full metal jacket, round nose, soft core at 430 m/s

Level EN 1063 BR 4

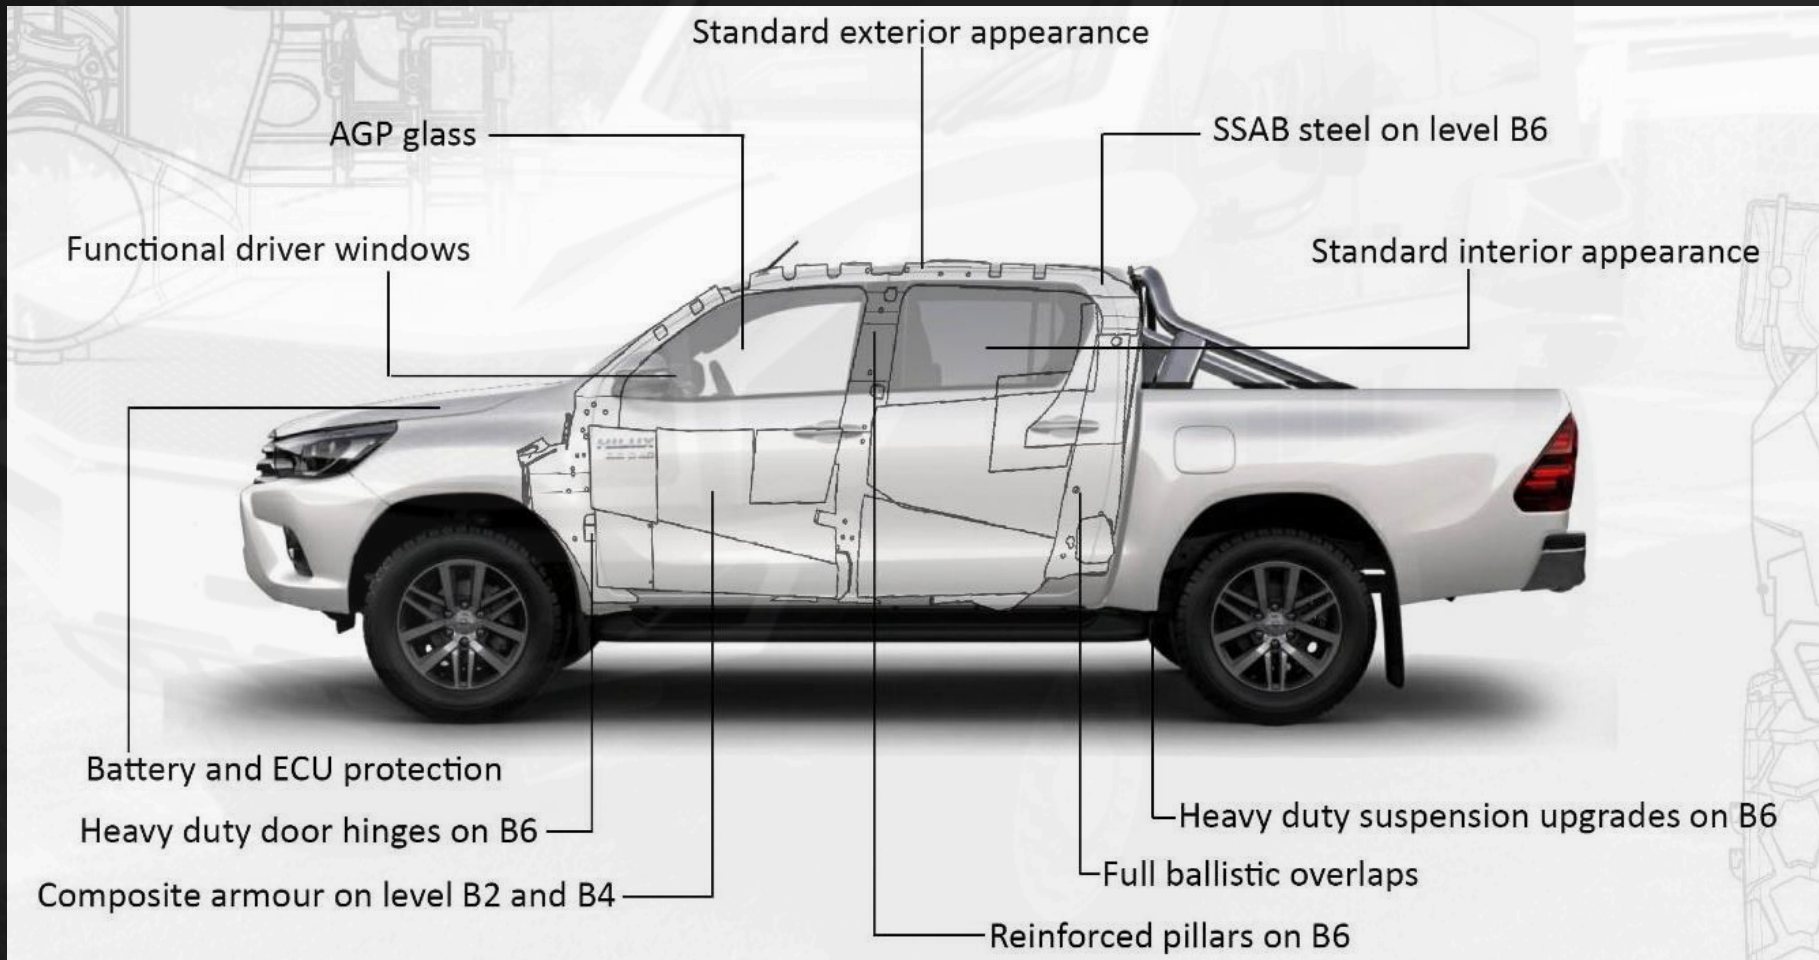

- High power handgun up to .44 Magnum
- Full metal jacket, flat nose, soft core at 440 m/s

Level EN 1063 BR 6

- High power rifles including AK47 up to 7.62x51 Nato
- Full metal jacket, pointed bullet, soft core

Armoured Vehicles

Deploying Skilled Personnel

Vehicle Driver

- Offensive and defensive driving techniques
- Off-road 4x4 driving techniques
- High-speed driving

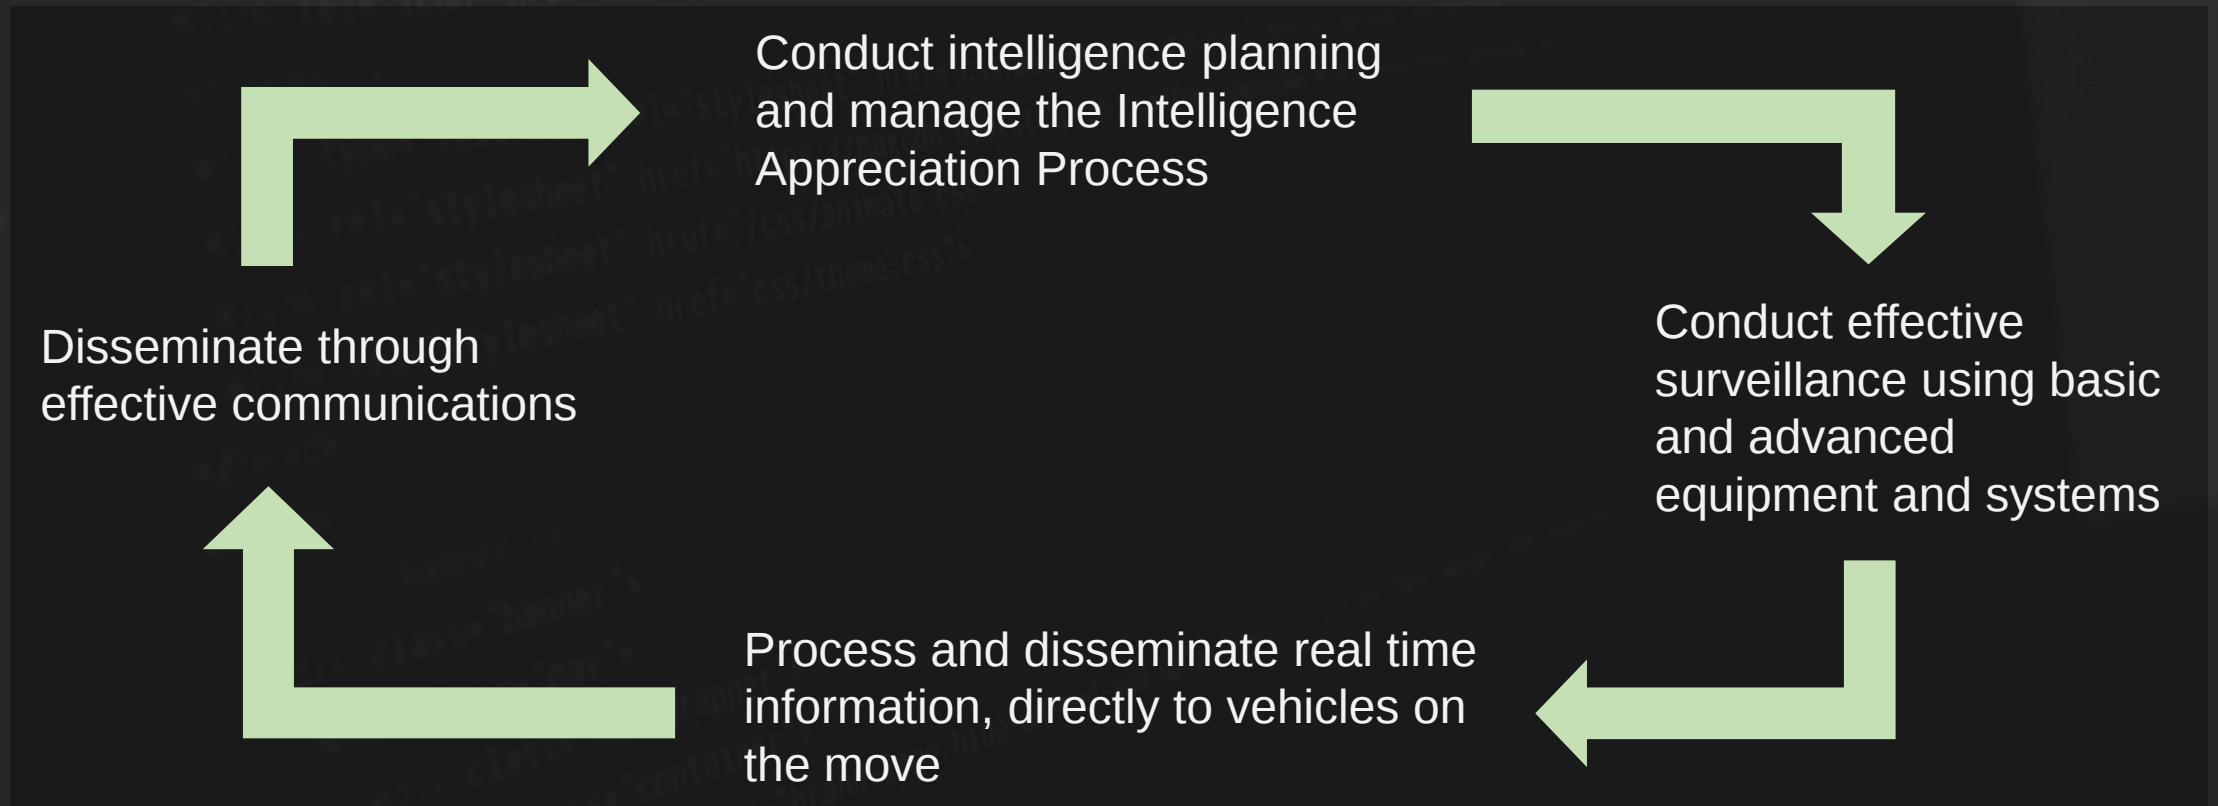

Protection Team

- Vehicle congestion drills
- Immediate action drills for attacks from the front, side, rear and IEDs
- Cross loading
- Foot drills
- Vehicle breakdowns
- Overturned vehicles
- Executive protection

TACIS System

TACIS supports organisations to conduct intelligence operations and provides decision makers with real time intelligence.

TACIS System

Equipment

- Fully Day/Night Capable
- Vehicle Integration
- All Weather
- Built-in Communications
- UAV Systems
- Short, Medium and Long Range

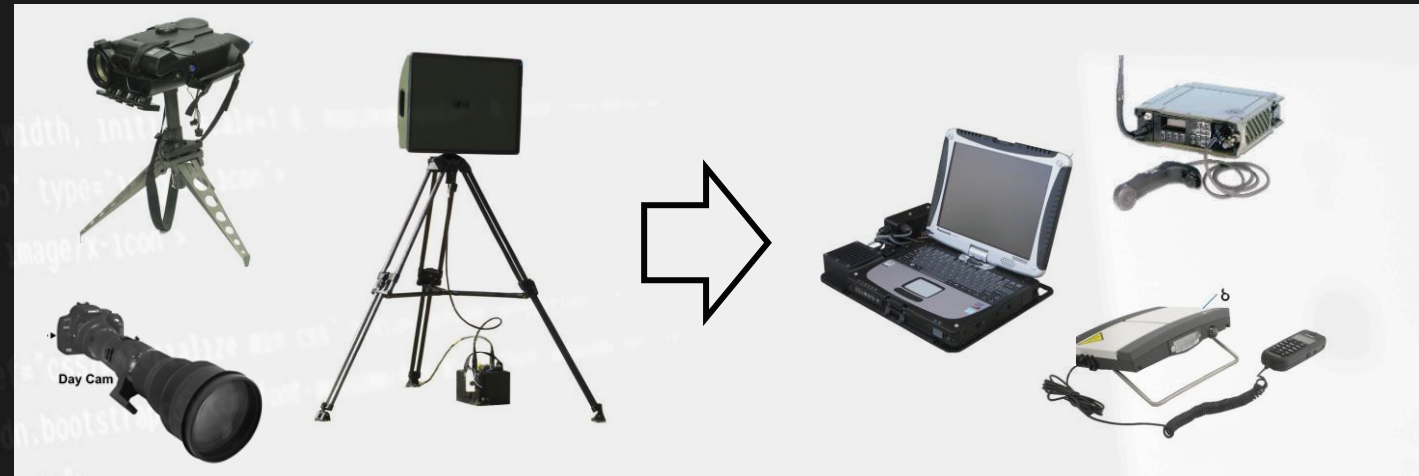

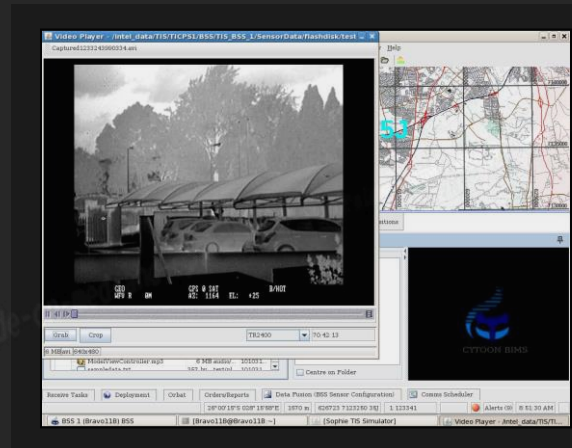

Image and Video Capturing

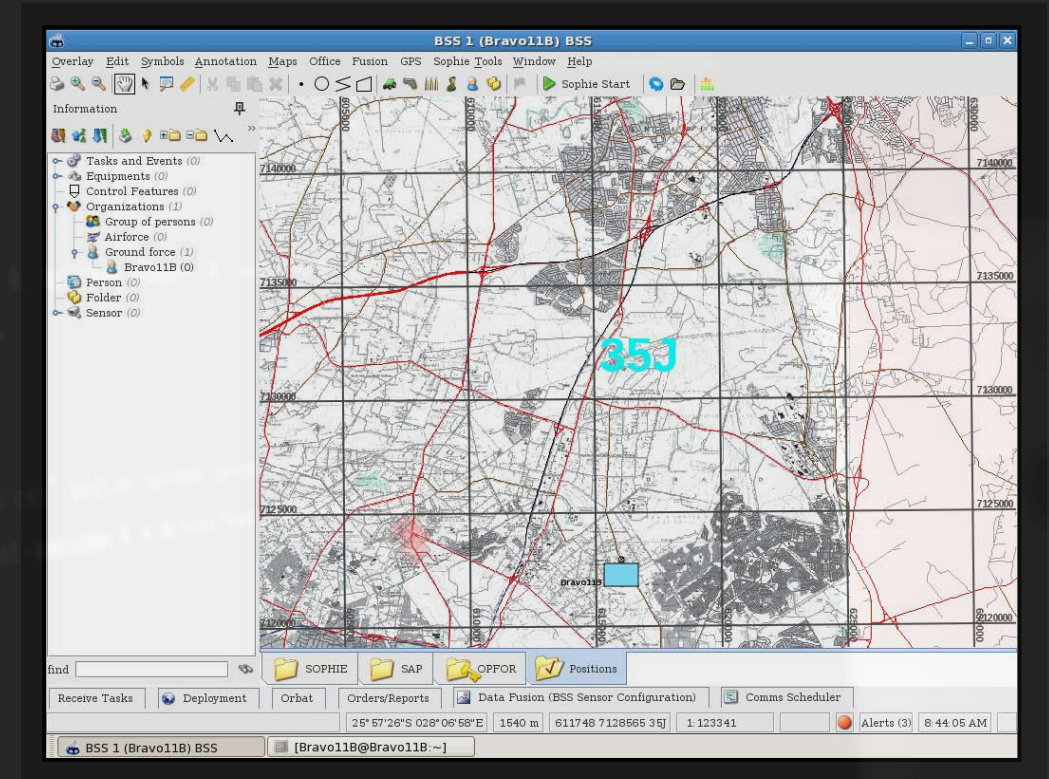

- Capturing, Editing and Transmission
- Annotations, Compression and Enhancement
- Cropping and Resizing
- All media/information can be transmitted to vehicles on the move for updates

TACIS System

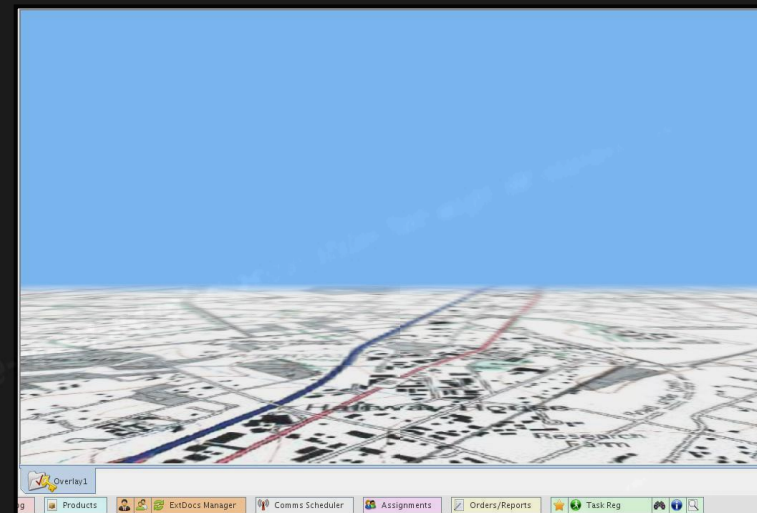

Mapping

- Geographic Information Display
- Variety of map formats
- Fully integrated with sensors
- Advanced overlays
- Customer defined functions and map symbology

3D Flythrough

- Terrain Understanding
- Navigation Planning
- Terrain Profiling
- Mission Rehearsals
- Scout vehicles can determine safety of route, minutes before departure

Turnkey Solution

Travel Management and Protection Solution

Information Gathering

Closed and open source information gathering from a variety of sources including, but not limited to, HUMINT deployed in country, open news media, and social media.

Threat and Risk Assessment

Utilisation of the gathered information to conduct a comprehensive Threat and Risk Assessment (TRA) using Focus Group's Threat Risk Assessment Process and Risk Matrix.

Surveillance

Guided by the TRA, surveillance will be conducted in applicable areas using basic and advanced equipment. Surveillance can also be conducted immediately prior to journey departure to evaluate route security.

Data Processing

Gathered data will be processed by an analyst team, using a variety of analysis techniques and software, including the TACIS system.

Reporting

Key findings will be compiled and provided to the client in a variety of forms including: incident analysis, incident and terrain mapping, as well as route modelling and alerts.

Armoured Vehicle

Finally, the client will be provided with an armoured vehicle (of the appropriate specification) with a trained driver. Trained armed security personnel will be optional.
